Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/619,022	Applicant(s) KATZ ET AL.
	Examiner ABHISHEK VYAS	Art Unit 3691

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 23 October 2009.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-23 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Status of Claims

1. This action is in reply to the request for continued examination filed on 10/23/2009
2. Claims 1-23 are currently pending and have been examined.
3. Claims 1-23 are rejected.
4. This is a non-final rejection.

Continued Examination Under 37 CFR 1.114

5. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/23/2009 has been entered.

Response to Arguments

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection. Basis for the rejections are provided with the claims rejections below.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-23 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
8. In particular, claim 1 recites in the preamble "An anti-money laundering system operating on a computing system containing encoded data that when executed provides an anti-money laundering system for providing risk assessment determinations" the body of the claim does not contain any limitations indicating the structure of the device. A system or an apparatus claim should always claim the structure or the hardware that performs the function. Applicant's claimed limitations consist of modules (software according to the specification) that do not describe the structure of the device. Appropriate correction is required. Are the modules the encoded data? It is vague and indefinite how the encoded data is linked to the modules and what structural component (hardware) of a computing system is executing the data. The recitation of "operating on the computing system and configured to..." do not further specify the structure of the system. It is unclear whether the system has a processor, a memory and/or storage that store these software modules which when executed by a processor perform or carry out the steps specific to the instant application.
9. Claim 12, recites "A computer implemented method having a computing system containing encoded data that when executed provides anti-money laundering risk assessment determinations at a branch" it unclear how the computer implemented method *having a computing system* carries out the transformation central to the operation of the claim. It is vague and indefinite how such steps are being performed without being tied to a machine.
10. Claims 2-11, and 13-23 are rejected on their dependencies to claim 1 and 12.

Claim Rejections - 35 USC § 101

11. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

12. Claim 1-11 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
13. Claim 1 recites in the preamble "A computing system containing encoded data that when executed provides an anti-money laundering system for providing risk assessment determinations" The body of claim 1 recites "code means" for each limitation. Therefore claim 1 is non-statutory because it is directed towards software, *per se*, lacking storage on a medium, which enables any underlying functionality to occur. It is not clear whether instructions are in executable form and therefore there is no practical application.
14. Claims 2-11 are rejected for their dependency on claim 1.
15. Claims 12-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
16. Claims 12-23 recite a process comprising the steps of identifying, assigning, identifying, determining, performing and providing. Based on Supreme Court precedent, a proper process must be tied to another statutory class or transform underlying subject matter to a different state or thing (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780,787-88 (1876)). Since neither of these requirements is met by the claim, the method is not considered a patent eligible process under 35 U.S.C. 101. To qualify as a statutory process, the claim should positively recite the machine to which it is tied, for example by identifying the apparatus (or machine) that accomplished the method steps or positively reciting the subject matter that is being transformed, for example by identifying the material that is being changed to a different state. Claim 1 and 12 at issue do not recite a machine and instead claim use of mental processes (as interpreted in light of 35 USC 112 second paragraph) to solve the step of identifying, assigning, identifying, determining, performing and providing and therefore they are non-statutory. Amended Claim 12 recites: identifying risk dimensions stored in at least one of a plurality of databases, assigning via a computer and providing via the computing system. These

amendments are not sufficient to deem the claim statutory. These steps recite insignificant extra solution activity according to *In re Bilski* and there is no machine tied to the central transformative step of determining the transaction risk or numerical designations.

17. Claims 13-23 are rejected for their dependency to claim 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

18. **Claims 1-23** rejected under 35 U.S.C. 103(a) as being unpatentable over Lawrence United States Patent No. 7,181,428 in view of Lawrence United States Patent Application Publication No.: 2003/0177087 (herein after Lawrence '087) and Bosworth-Davies et al (herein after Davies) US PG-PUB No.: 2003/0033228.

19. **As per claim 1**, Lawrence discloses the following limitations:

- a risk assessor module for providing to an authorized user of the anti-money-laundering system, guidelines in identifying risk dimensions associated with potential money laundering transactions processed by the branch of the financial institution (see at least Lawrence column 1, lines 14-27; column 2, lines 58-67; column 3, lines 13-22 and 65-67; column 4, lines 47-50; column 5, lines 16-30).
- a policy builder module for recommending possible electronic and manual countermeasures to the risks identified by the risk assessor module and for enabling the authorized user to select the countermeasures of his choice in order to create a policy for the branch of the financial institution (see at least Lawrence column 2, lines 40-42; column 3, lines 3-12).

- an account opening due diligence module for providing detailed recommendations to the authorized user as to whether to allow an application for an account at the branch of the financial institution and for applying consistent implementation of the policy throughout the branch of the financial institution; (see at least Lawrence column 2, lines 38-40; and lines 53-62).

Lawrence does not specifically disclose the following limitation. Lawrence '087, however, teaches the limitations as follows:

- a transaction activity monitor module for receiving and monitoring transaction information including transaction information received by the account opening due diligence module, identifying risk dimensions associated with potential money laundering transactions processed by the branch of the financial institution, assigning numerical designations for the risk dimensions identified for the branch of a financial institution and for identifying suspicious patterns among the transactions at the branch of the financial institution in order to provide a suspicious transaction activity report; related to potential money laundering transaction processed by (see at least Lawrence '087 paragraphs 0008-0010, 0022-0024, 0028, 0040-0042, 0047, 0065, 0068-71).
- identifying suspicious patterns among the transactions includes determining whether a financial transaction to be conducted has a risk related dimension (see at least Lawrence '087 paragraphs 0008-0010, 0028, 0038, 0055-56, 0066-69, 0078).
- determining whether the numerical designation of at least a selected one of the identified risk dimensions for the financial transaction to be conducted exceeds a predetermined level when the financial transaction to be conducted does have a risk-related dimension; and (see at least Lawrence '087 paragraphs 6, 8-10, 33, 35, 0055-56, 0065-0069, 0071, 0078).
- performing a special risk assessment procedure if the numerical designation of at least a selected one of the identified risk dimensions exceeds a predetermined level

(see at least Lawrence '087 paragraphs 0008-0009, 0055-56, 0065-67, 0097 and figure 7C).

Lawrence does not explicitly disclose the following limitation. Davies however teaches the limitations as follows:

- a case management and reporting module for tracking and identifying the detailed recommendations of the account opening due diligence module in order to provide continuous feedback to the authorized user about the effectiveness of the system (see Davies paragraphs 6, 11, 33-35, 41, 46-47, 73, 80-82)

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the system of Lawrence with Lawrence '087 to monitor transactions and high risk transactions to prevent money laundering and associated liabilities (see at least Lawrence '428 column 3, lines 18-22; column 4, lines 44-55; column 5, lines 22-30; column 6, lines 35-40; column 8, lines 44-48; Lawrence '087 paragraphs 0006, 0008-009). It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the system and method of Lawrence to specifically include surveillance and countermeasure management reports. One would be motivated to do so to detect the basis of the transaction, assess its legitimacy and conduct a comprehensive analysis with all the facts presented in manner that leaves an audit trail for full compliance with any existing regulations (see Davies paragraphs 4-5, 11, 34 and 45-47).

A numeric threshold is taught by Davies in paragraphs 11, 34, 40, 48, 63 and 76. Lawrence 087 also discloses a numerical threshold in paragraphs 33, 82 to filter out transactions or events that are not subject to extra scrutiny. Davies teaches report generation in paragraphs 45, 47-48. In response to applicant's argument to the 35 USC 103 rejections that Lawrence (7,181,428) is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for

rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, although Lawrence '428 may address the question of how to discover political risk from a host of potential events and activities, it still discloses functional limitations identically identifying monetary risk as claimed in the instant application. Lawrence discloses identifying, monitoring and evaluating financial transactions for suspicious activities and risks (see Lawrence '428 column 4 lines 28-63, figure 3 and related text). Therefore the argument that Lawrence '428 is allegedly non-analogous to the instant application is unpersuasive.

20. As per claim 2, Lawrence teaches the following limitation:

- a staff training and policy management module for using the selected countermeasures to develop customized training programs and to track compliance of users of the anti-money-laundering system (see at least Lawrence column 3, lines 65-67; column 4, lines 47-55).

21. As per claim 3, Lawrence teaches the following limitation:

- the risk assessor module comprise geographic location risk, types of customers served, and types of services offered by the financial institution (see at least Lawrence column 1, lines 56-60; column 4, lines 56-67; column 5, lines 34-36 and column 8, lines 16-24).

22. As per claim 4, Lawrence discloses the limitation as follows:

- the policy builder module provides detailed support for the decision process in creating the policy (see at least Lawrence column 6, lines 33-40; column 7, lines 1-9).

23. As per claim 5, Lawrence discloses following limitation:

- the authorized user can override for the branch of the financial institution, the detailed recommendations provided by the account opening due diligence module (see at least Lawrence column 5, lines 42-50).

24. As per claim 6, Lawrence teaches the following limitation:

- the transaction information received and monitored by the transaction activity monitor further comprise historical data (see at least Lawrence column 5, lines 66-67; column 6, line 1).

25. As per claim 7, Lawrence teaches the following limitation:

- the transaction information received and monitored by the transaction activity monitor further comprises input from employees of the branch of the financial institution (see at least Lawrence column 3, line 65; column 4, lines 5-18).

26. As per claim 8, Lawrence teaches the following limitation:

- the case management and reporting module tracks and identifies the detailed recommendations of the account opening due diligence module that are overridden by the authorized user, and updates the account opening due diligence module based on the override (see at least Lawrence column 3, lines 3-5, lines 18-22; column 5, line 42-50).

27. As per claim 9, Lawrence teaches the following limitation:

- the risks identified by the risk assessor module are used to determine the level of review applied against a selected operation or transaction (see at least Lawrence column 3, lines 23-27; column 4, line 19-31, lines 47-50).

28. As per claim 10, Lawrence teaches the following limitation:

- the level of review is selected from the group consisting of standard review or special review (see at least Lawrence column 8, lines 39-41).

29. As per claim 11, Lawrence teaches the following limitation:

- the system is communicatively coupled to an electronic network including a plurality of databases, and wherein the transaction activity monitor component gathers information stored on the plurality of databases in order to monitor the suspicious transactions, and processes the information to output the risk assessment guidelines and an explanation of the risk assessment guidelines (see at least Lawrence column 8, lines 7-15).

30. As per claim 12, Lawrence discloses the following limitation:

- identifying risk dimensions associated with potential money laundering transactions processed by the branch of a financial institution (see at least Lawrence column 1, lines 14-25).
- assigning numerical designations for the risk dimensions identified for the branch of a financial institution (see at least Lawrence column 5, lines 15-21; column 6, lines 33-40).
- providing to an authorized user recommended guidelines for handling the financial transaction to be conducted, based on the special risk assessment procedure (see at least Lawrence column 9, lines 15-32).
- determining whether the numerical designation of at least a selected one of the identified risk dimensions for the financial transaction to be conducted exceeds a predetermined level, if the financial transaction to be conducted does have a risk-related dimension (see at least Lawrence column 5, lines 22-30; column 8, lines 44-48).

Lawrence does not specifically disclose the following limitations Lawrence '087, however teaches, the following limitations:

- identifying a type of financial transaction to be conducted at the branch of a financial institution (see at least Lawrence '087 paragraphs 008-0010, 0022-0024).
- determining whether a financial transaction to be conducted has a risk-related dimension (see at least Lawrence '087 paragraphs 0040-0042, 0047, 0065).
- performing a special risk assessment procedure when the numerical designation of at least a selected one of the identified risk dimensions exceeds a predetermined level (see at least Lawrence '087 paragraphs 0040-0042, 0047, 0065)

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the system of Lawrence with Lawrence '087 to monitor transactions and high risk transactions to prevent money laundering and associated liabilities (see at least

Lawrence column 5, lines 22-30; column 6, lines 35-40; column 8, lines 44-48; Lawrence '087 paragraphs 0006, 0008).

31. As per claim 13, Lawrence teaches the following limitation:

- performing a standard risk assessment procedure if the numerical designation of none of the identified risk dimensions exceeds a predetermined level (see at least Lawrence column 9, lines 20-23).

32. As per claim 14, Lawrence teaches the following limitation:

- a first risk dimension representing a risk due to a location of the branch of the financial institution (see at least Lawrence column 8, lines: 18-24; 44-45; 59-61).
- a second risk dimension representing the risks due to selected services offered by the branch of a financial institution (see at least Lawrence column 8, lines 44-45; lines 64-67; column 9, lines 1-14).
- a third risk dimension representing the risks due to an identified nature of the customers served by the branch of the financial institution (see at least Lawrence column 8, lines 44-45, 53-58).
- a fourth risk dimension representing the risks due to a particular jurisdiction served by branch of a financial institution (see at least Lawrence column 5, lines 53-56; column 7, lines 54-67).

33. As per claim 15, Lawrence teaches the following limitation:

- the risk dimensions are based on local laws, regulations, historical data, and other information that is specific to the branch of the financial institution (see at least Lawrence column 4, lines 32-36).

34. As per claim 16, Lawrence discloses the following limitation:

- each of the selected services has associated accounts, each of the associated accounts having a risk rating and risk exposure rating, and wherein each risk dimension is based on a risk rating and a risk exposure rating of all associated

accounts of all of the selected services (see at least Lawrence column 2, lines 34-42; column 5, lines 38-42; column 6, lines 35-40).

35. As per claim 17, Lawrence teaches the following limitation:

- the second and the third risk dimensions are based on data collected from the selected services (see at least Lawrence column 4, lines 5-18; column 7, lines 54-67; column 8, lines 1-15).

36. As per claim 18, Lawrence discloses the following limitation:

- performing a standard risk assessment procedure if it is determined that the financial transaction to be conducted does not have a risk-related dimension, wherein the standard risk assessment is based on the average of the numerical designation for all of the risks (see at least Lawrence column 6, lines 35-38; column 9, lines 59-62).

37. As per claim 19, Lawrence teaches the following limitation:

- the type of financial transaction to be conducted at the branch of a financial institution comprises opening an account, and wherein the risk dimension for the account opening is based on the risk due to the identified nature of the customers served by the branch of the financial institution (see at least Lawrence column 5, lines 36-42).

38. As per claim 20, Lawrence teaches the following limitation:

- wherein the nature of the customers served by the branch of the financial institution includes high-risk clientele, and wherein the special risk assessment procedure is performed for the account opening (see at least Lawrence column 1, lines 11-13, lines 30-43; column 2, lines 53-55).

39. As per claim 21, Lawrence teaches the following limitation:

- when it is determined to perform a special risk assessment procedure for a financial transaction, the special risk assessment procedure is performed semi-annually, and wherein when it is determined to perform a standard risk assessment procedure for a financial transaction, the standard risk assessment procedure is performed annually (see at least Lawrence column 3, lines 65-67; column 6, lines 14-18).

40. As per claim 22, Lawrence teaches the following limitation:

- overriding by an authorized user the recommended guidelines for handling the financial transaction to be conducted (see at least Lawrence column 5, lines 42-50).

41. As per claim 23, Lawrence teaches the following limitation:

- the authorized user provides alternative guidelines after the step of overriding the recommended guidelines for handling the financial transaction to be conducted (see at least Lawrence column 5, lines 51-56; column 6, lines 20-23).

Examiner's Note: The prior art below are made of record and are not relied upon in this rejection.

These references are considered pertinent to applicant's disclosure. The prior art references in the same field of endeavor as the instant application are:

1. Lawrence United States Patent Application Publication No. 2003/0233319
2. David Lawrence, United States Patent Application Publication 2004/0024693 and 2004/0024694.
